

ELECTRIC TROLLEY

TWO YEAR WARRANTY

Robust construction

Machined steel wheels and pinion gears

Integrated bumpers and drop stops

One or two-speed motors

Five available travel speeds

ROBUST CONSTRUCTION

Like Vulcan electric chain hoists, our electric trolleys are of solid and durable construction. Their wheels and pinion gears are made of machined and case-hardened steel to ensure maximum wear resistance. Bumpers and drop stops are integrated into the design for greater safety and protection from impact.

Their design, with two supporting bolts (three for the 10T model), ensures greater strength and solidity under all load conditions.

Designed mainly for use with Vulcan hoists, they can also be paired with other manufacturers' hoists on a wide range of H or I beam sizes.

Vulcan electric trolleys are available with a choice of five travel speeds and a one- or two-speed motor.

A range of options are available: built-in motor brake, sealed control enclosure (NEMA 4 and 12), humidity/ acidity treated motor, limit switches, and more.

Lastly, depending on the hoist-trolley combination and selected options, we stock all available controls (including radio remote controls).

MODEL	Capacity	Min. beam height*	Flange width*		Headroom under wheels*	Wheel tread*		Min. curve radius*	Weight lb
			Min.	Max.		Width	Dia		
ET1T	1T	4	2 1/2	5	4 1/4	1	2 3/4	28	105
ET2T	2T	5	4	6	4 1/2	1 1/2	3 3/4	33	140
ET3T	3T	5	4	6 1/4	5 3/4	1 5/8	4 1/4	35	175
ET5T	5T	6	4	7	6 1/2	1 3/4	5	48	215
ET6T	6T	6	4	6 1/2	6 5/8	1 3/4	5	49	225
ET10T	10T	8	4	6	9 3/8	1 3/4	6	61	380
Speeds available from 18 to 72 fpm						Voltage from 120 to 550V, 1 or 3 phases
